Process for a second application for new irrigated acres and/or uses.

Landowners can submit 2 applications for new irrigated acres and/or uses during the application period. (1 field of 160 acres or 160 acre feet of consumptive use per application.)

Landowners must decide which application will be ranked first.

If there are at least 160 acres left over after ranking all the first applications, then landowners who have submitted a second application will be considered for the remaining acres.

If there are less than 160 acres left over after the first ranking process, then landowners who have submitted 2 applications will be refunded the second application fee.

All application fees are nonrefundable if the application has been ranked for the consideration of new irrigated acres and/or uses.

Please call if you have any questions.
