INSTRUCTIONS TO APPLICANTS

1. **If you are not the person operating or chemigating on this field, please send this form on to that person for them to fill out.** Fill in the information on the top half or application portion of this form. Type or print using a ball point pen and press firmly.
2. Do NOT mark the lower half or permit portion of the form.
3. Submit the completed application form and fee to the appropriate Natural Resources District. Fees are nonrefundable.
4. The permit fee is \$75 for new permit, \$50 for a renewal permit, and \$300 for an emergency permit. Application for renewal permit must be received by the NRD on or before June 1st of the year following the year in which the permit was issued. If there was a valid permit on this field in the previous year it can be classified as a renewal permit. If there was no permit on this field in the previous year it must be classified as a new permit.

NOTICE: New and renewal permits are annual and expire May 31st of the year following the year in which the permit was issued. An emergency permit expires 45 days after it is issued.

NOTICE: Submit the completed application and fees to the appropriate Natural Resources District. Permit Fees are Nonrefundable. Permits are not transferable. The Natural Resources District and the Nebraska Department of Environment and Energy shall have access to the Chemigation system at all reasonable times for inspection of the chemigation system as set forth in the Nebraska Chemigation Act.

Permits received after June 1st will be considered a new permit and subject to new permit rules and fees.

REPORTING OF ACCIDENTS

Any actual or suspected accident related to the use of a chemigation system must be reported to the appropriate Natural Resources District and the Nebraska Department of Environmental & Energy (NDEE) within 24 hours of its discovery. NDEE may be reached at (402) 471-2186 during normal working hours. After normal working hours, contact the Nebraska State Patrol at (402) 471-4545.

When reporting an accident include all known information, such as time of occurrence, quantity and type of chemical, location and any corrective or cleanup action presently being taken. NDEE may request additional information and when required, will develop a plan for cleanup and recovery of contaminate. The permit holder is responsible for the actual cleanup.
